SUMMARY

Results-driven and detail-oriented computer science student with a year of barista experience, complemented by successful completion of a comprehensive web developer bootcamp. Demonstrated ability to deliver high-quality work through the development of two personal projects. Aiming to leverage technical expertise, problem-solving skills, and a strong educational foundation to contribute to a junior software engineering role and drive innovative solutions in a collaborative and dynamic environment.

EXPERIENCE

Barista

Aroma Joes

June 2022 - Present, North Andover, MA

- Skilled in operating and fixing POS systems, displaying a quick ability to learn new technologies and resolve issues effectively.
- Built a customer-focused mindset as a barista, which led to prioritizing user needs and expectations in order to develop user-friendly applications and solutions as a developer.

PROJECTS

Portfolio Website

May 2023 - June 2023

- Designed an interactive website using React.
- Constructed a UI by determining which fonts, themes, and animations to use.
- Embedded my favorite games directly into my website. They were constructed through several APIs, ChessJS, ChessBoardTS, MinesweeperAPI

Yelp Camp

March 2023 - June 2023

- Developed a web application similar to that of Yelp; users post and review campsites rather than restaurants.
- Constructed schemas for reviews, users and campsites, which are stored via MongoDB.
- Designed the front end/UI with EJS, Bootstrap, and several npm packages.
- Configured a back end with Express Router, middleware, and HTTP requests.

EDUCATION

Bachelor Of Science in Computer Science

Minor in Mathematics • University Of Massachusetts, Boston • Boston, MA • 2024

COURSEWORK

Introduction To Software Engineering

University Of Massachusetts, Boston • 2023

Database Management

University Of Massachusetts, Boston • 2023

Advanced Data Structures & Algorithms

University Of Massachusetts, Boston • 2023

SKILLS

Front End: EJS, HTML, CSS, React, Bootstrap, Tailwind

Back End: MongoDB, Express, Flask

Technologies: Excel, Github, NPM
